Profile

Frontend Developer with 2+ years of experience building scalable and user-friendly web applications using SAPUI5, React.js, and SAP Fiori design principles. Adept in creating reusable components, optimizing UI performance, and collaborating in agile teams. Delivered high-quality frontend solutions for enterprise-grade SAP applications and modern React UIs. Actively seeking a opportunity to apply my skills in impactful projects.

Professional Experience

Frontend Developer (SAPUI5/React), Atom

07/2023 – Present | Dubai, Remote

- Developed innovative business applications by leveraging SAPUI5 and React.js to create user-friendly web applications for over 1000 internal users.
- Developed modular and reusable components using React.js and SAPUI5 XML views, which improved code maintainability.
- Collaborated closely with a diverse team of UI/UX designers and backend developers to integrate RESTful APIs and OData services and ensure pixel-perfect UI delivery.
- Led frontend testing and debugging processes, reducing production bugs.
- Contributed to sprint planning, reviews, and retrospectives in a cross-functional.

Education

Bachelor of Science in Information Systems Management, Polytechnic Institute of Setúbal

09/2020 – 10/2023 | Setúbal, Portugal

Projects

Liga dos Veteranos do Sado

07/2023 – present

- Designed and developed a responsive football league website using React.js and Supabase, tailored for a regional community with 100+ active players.
- Implemented live match scores, player stats, and match stats to create an engaging user experience.
